

Fun And Fundamentals: Activities For The Classroom

follow up - 1 hour session

1. Whole class discussion (5 mins) - put your hand up if you:
 - Played on wheels.
 - Made up a dance.
 - Built a fort.
 - Went swimming.
 - Went on a treasure hunt.
2. In pairs, tell the person sitting next to you about your out of school adventures - what was your favourite fun activity? (5 mins)
3. Brainstorm all the different activities on the board. (5 mins)
4. Choose one of the following activities for the children to complete. (45 mins)

1. create your own adventure map
Ask the children to draw a map in preparation for their next adventure. They should include at least 6 fun activities so they can do one every week for 6 weeks. They could also include advice for adventurers on healthy rations and any useful equipment they might need to take with them.

2. create a passport to fun
Ask the children to create a passport showing the adventures they have had over the last 6 weeks. There should be a page per week and each page should have a stamp representing what they did - for example, a picture of a bike could represent a bike ride. They could also include healthy snacks and meals they ate on the way.

3. write an adventure in six words
Ask the children to think back over their adventures and choose one activity as their favourite. Challenge them to write about what they did in no more than 3 sentences. Then ask them to cut it down to only one sentence and finally down to 6 words, for example: I like swimming and making splashes or hop, skip, be active - stay fit! Ask them to share their stories with the class.

Fundamentals of Nursing Co-Author Barbara L. Yoost, MSN, RN, CNS, CNE, ANEF shares ten ideas for infusing active learning into your classroom lessons. Divide the class into teams (teams depending on size of classroom and number of available patient mannequins or body parts). Give students a question or problem and ask them to think quietly of an answer or solution. Have them pair up with another student and discuss their responses. Or bring humor into the class and have fun watching this fun video on GroupThink (Link). There are several groupthink active learning activities. Integrating these four fun activities, we also investigate a strategy to optimize a player's score on a turn in Farkle and indicate possible additional explorations. Now you can teach the fundamentals of computer science, whether you have computers. In this lesson, students will relate the concept of algorithms back to real-life. Those abstracted stories become templates for fun and crazy new ones.
